Education

Vellore Institute of Technology

Oct 2022 – Jun 2026

B.Tech in Computer Science and Engineering (CGPA: 8.71/10)

Technical Skills

Programming Languages: Java, JavaScript, TypeScript, HTML, CSS

Frameworks & Backend: Spring Boot, Node.js, Express.js, React, Next.js, Tailwind CSS

Databases & Caching: MySQL, PostgreSQL, MongoDB, Redis

Tools & Technologies: Docker, CI/CD, Git, GitHub

Work Experience

Parqis

Aug 2026 – Present

Backend Developer Intern

Remote

- Architected and developed production backend modules using TypeScript, PostgreSQL, and Redis, supporting core product and payment workflows.
- Designed a brand- and category-mapped size chart data model, enabling size information to be managed centrally instead of updating size data individually across products, reducing redundant database writes.
- Built a role-based access control system for an admin portal, supporting configurable View/Edit/No Access permissions, multi-role permission merging, per-member overrides, Super Admin controls, and emergency access lockdown across protected backend APIs.
- Implemented and integrated payment workflows for Creator Brands and Admin operations, handling payment-related backend logic and data flows.

Jio Platforms Limited

Oct 2024 – Dec 2024

Software Development Engineer Intern

Mumbai

- Engineered backend services using Node.js, Express.js, and TypeScript and integrated them with React-based clients supporting production workflows.
- Designed RESTful endpoints with structured validation and standardized responses, reducing client-side integration issues.
- Configured authentication, authorization, and centralized error-handling middleware, improving API stability and reducing recurring runtime failures.
- Partnered with frontend engineers to align API contracts and data schemas, accelerating feature rollout and minimizing integration rework.

Projects

eVentIT — Event Hosting Platform with In-house Video Conferencing

[GitHub](#)

- Architected a full-stack event platform supporting real-time video meetings and chat using WebRTC and Socket.io.
- Enforced role-based access control (RBAC) with JWT authentication, preventing unauthorized access across user and coordinator workflows.
- Orchestrated backend workflows for event creation, registration, and participant tracking with structured validation and error handling.
- Optimized MongoDB schemas and indexing strategies, improving query performance for event lookups.

ELearning — Digital Learning Platform

[GitHub](#)

- Designed a Next.js + MERN architecture with server-side rendering and improving initial page load.
- Introduced Redis-based caching for frequently accessed course data, reducing direct database reads.
- Engineered modules for course publishing, media streaming, Q&A threads, and discussion workflows.
- Structured backend services using MVC design principles, simplifying feature expansion and long-term maintenance.
- Delivered an admin dashboard with engagement metrics and course analytics to support content management decisions.

Co-curricular Activities

BashCraft Club, VIT Bhopal University

Aug 2024 – Jan 2025

Tech Co-Lead

Campus

- Directed technical ideathons and workshops with 300+ participants, strengthening student engagement across campus.

Achievements

- Achieved LeetCode rating of 1558 (Top 30%) through consistent participation in competitive programming contests.
- Ranked in the top percentile (79%) among 23,872 candidates in NPTEL Cloud Computing Certification (IIT Kharagpur).
